

## SmartPack™

### Scan. Pack. Verify.

Revolutionize shipping with SmartPack™. Designed to automate and verify packing accuracy, SmartPack optimizes shipping prep-time and streamlines your packing process.

#### Smart Scanning and Heads Up Packing.

Create well-defined packages for your customers and offer unprecedented value with complete order visibility.

- Mouse and keyboard free packing
  - Track the quantity of items to be shipped and packed
  - Assign dimensions, tare weight, actual weight and UCC-128 numbers
  - Maintain efficient packing stations to increase productivity
  - Verify order completion and packing accuracy
  - Send batch alerts for large orders
  - Apply package level tracking numbers
- > **True Automation**  
Automation starts the moment an order is received. From scanning required items, tracking what is already packed, and creating custom shipping or UCC-128 labels, SmartPack's completely handsfree process automates packing reducing human error.
- > **Order Verification**  
Eliminate the need for warehouse staff to re-check orders over and over. Scan once, pack once, and verify the entire order in real-time. Guarantee accuracy every time with alert notifications.
- > **Easy to Use**  
Step-by-step actions offer a reliable packing method to help increase productivity and efficiency of warehouse operations. Drive dependable packing results for all of your customer's packages by removing the guess work for your staff.

#### 100% Verified Packing

- > Handsfree packing process
- > Eliminate human error
- > Create customer specific rules
  - > Custom workflows
  - > Completion tasks
  - > Document creation
- > Auto calculate package weight
- > Serial number capture

3PL Central has helped us improve our shipping by implementing a scan pack system, enabling us to create an assembly line, to increase our speed, productivity, and efficiency.
