

SmartParcel™

On-Demand Shipping.

Print real-time small parcel shipping labels across all major carriers with SmartParcel™. Embedded directly into our WMS, SmartParcel is convenient, easy, and adds value to your warehouse operations.

Link shipping accounts for UPS, FedEx, DHL, Mail Innovations, APC and more. Whether you are drop shipping for retailers or shipping pre-paid on your warehouse account, SmartParcel manifests your orders in one, streamlined workflow.

End to End Solution.

When coupled with SmartPack™, SmartParcel completes your package journey. With a completely handsfree workflow and seamless integration to shipping carriers, your warehouse will see an increase in speed, productivity, and efficiency.

Scan. Pack. Verify. Ship. It's that easy.

- > **Multiple Shipping Accounts Per Customer**
Easily store unique carrier information for all of your customers. With SmartParcel, link your customers individual shipping accounts per carrier. Manage customer accounts for every carrier to offer accessible shipping, tracking, and billing.
- > **Configurable**
Create custom shipping and billing workflows. Use configurable label printing for 4x6 thermal, in-line, high-volume, and on-demand needs per customer. Provide dynamic shipping solutions and assign package reference numbers for painless shipping management.
- > **Easy to Use**
Remove the need to import or export shipping details and tracking numbers. SmartParcel offers your warehouse the ability to print shipping labels for all carriers and update tracking numbers from one interface in real-time. Reduce training requirements for your staff and save time.

Direct Access to Shipping Carriers

- > Integrated with multiple shipping carriers
- > Multiple billing methods
 - > Pre-paid by warehouse
 - > Bill directly to customers
 - > Bill 3rd party / retailer account
 - > Bill collect
- > Carrier account management for customers
- > Customer/Carrier rate return rules with markup for immediate billing

3PL Central really understands my needs as a 3PL and has developed the exact 3PL WMS functionality necessary to support my food-related inventory management system needs.
