

Optimize Retailer Communication with SmartPack+™

Scan. Pack. Verify.

Eliminate manual EDI entry and revolutionize your retailer communication with SmartPack+™. Designed to automate data flows and verify packing accuracy, SmartPack+ optimizes shipping prep-time and streamlines your entire order, invoicing, packing and labeling process. Enhance predictability and improve visibility all while generating fewer errors and reducing man hours.

ASN Process Automation and 100% Verified Packing

- Automatically receive orders through your SPS Commerce EDI feed
 - Automatically send ASNs and Invoices without manual entry
 - Pick, pack, and print retailer compliant UCC and GS1 labels with carton contents
 - Verify order completion and packing accuracy
- > **True Automation**
Automation starts the moment an inbound order is received until the moment it ships. From order receipt, ASN automation, scanning required items, tracking what is already packed, and creating custom shipping or GS1-128 labels, SmartPack+ helps you manage the entire lifecycle of a retail purchase.
- > **Order Verification**
Eliminate the need to re-check orders over and over. Scan once, pack once, and verify the entire order in real-time. Guarantee accuracy every time with alert notifications.
- > **Easy to Use**
Step-by-step actions offer a reliable order packing method to help increase productivity and efficiency of operations. Drive dependable packing results for all of your customer's packages by removing the guess work for your staff.

Improved Workflows. Happy Customers.

- > Direct EDI connection for Inbound Order Receipts (850/940)
- > Complete automation of ASN with carton-level details (856/945)
- > Integrated Quickbooks Invoicing (810)
